The Skyline datalogger was missing a few days of flow from JC-1 for August 2007. I have a call into Pacificorp (Cody Allred and Darcy Guymon) to see if their datalogger was communicating - but I have not recieved a reply. I assume you want me to wait an additional day or two to see if they respond. Let me know if you want me to submit estimated values for the missing days (8/27 - 8/31).
